Re: Emissions Banking Annual Report  
Agency Interest Number 285

Dear Mr. Johnston:

Attached is the ExxonMobil Baton Rouge Plastics Plant's (BRPP) Emissions Banking annual report as required by LAC 33:III:613.B. This submittal reflects BRPP's balance based upon the Title V permit application submitted in January 2006.

In August 2001, BRPP deposited 273.08 tons as a result of the A & D Thermal Oxidizer Project. On November 20, 2001, we received a certificate for an incorrect amount deposited for this project of 232.70 tons. A subsequent meeting with you was held concerning this incorrect certificate and a request for a new one. To date, BRPP has not received a corrected certificate.

Considerable uncertainty still remains with the emissions banking program regarding the methods by which the value of emission credits is determined and the amount withdrawn for netting and offset purposes. ExxonMobil has consulted with internal legal staff, and outside environmental consultants who have discussed several issues with the DEQ. ExxonMobil will continue to research these issues until the banking requirements are fully understood. A revised annual report may be submitted at that time. The following certification is qualified based on this disclaimer.

If you have any questions regarding this submittal, please contact Ms. Erin C. Hall at (225) 977-6329.

*I certify that, to the best of my knowledge, the statements and information contained in this report are true, accurate, and complete.*

Sincerely,

Dave A. Luecke  
Plant Manager
